

Relimiting the Profile

This task shows how to relimit the profile you just created by trimming some elements in this profile.

1. Double-click the Quick Trim icon  from the Operation subtoolbar (Relimitations subtoolbar).

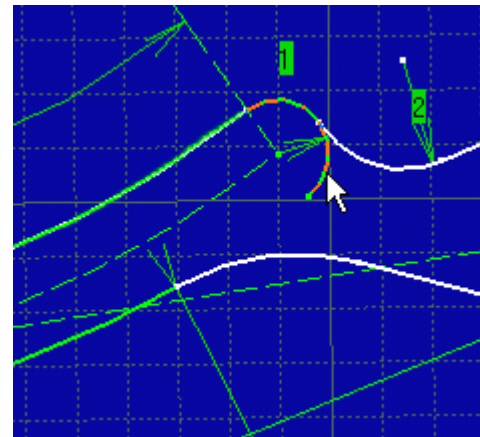

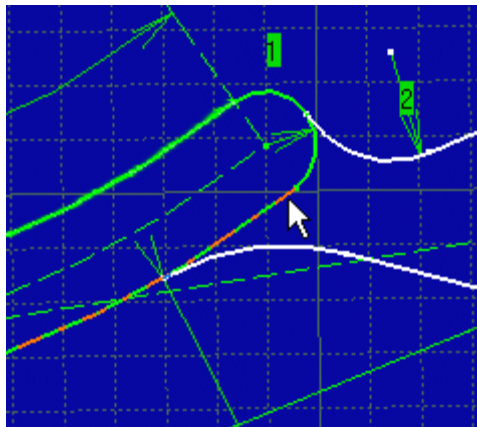

The possible trim option command are displayed in the Sketch tools toolbar.

2. Click the Rubber In option command in the Sketch tools toolbar.

3. Select the elements to be trimmed, one after the other.

These elements are automatically trimmed.
