Design, fabrication and characterization of diffractive optical elements

Coordinating prof.:

* Lect. PhD Ing. Liliana Preda

** Senior Scientist PhD Ing. Marian Zamfirescu

Student:

Ing. Călin Bogdan-Ștefăniță

* "Politehnica" University of Bucharest, Dept. of Physics

** National Institute for Laser, Plasma and Radiation Physics, Center for Advanced Laser Technologies

Ing. Călin Bogdan-Ștefăniță

2/39

Presentation plan

- Purpose of this work
- CGH Design
- Fabrication methods
- Characterization
- Conclusions

Ing. Călin Bogdan-Ștefăniță

3/39

Presentation plan

- Purpose of this work
- CGH Design
- Fabrication methods
- Characterization
- Conclusions

22 Jan 2016

"Politehnica" University of Bucharest – Faculty of Applied Sciences – Master IALA – Research Report, 3rd sem,

Ing. Călin Bogdan-Ștefăniță

4/39

Purpose

- Study of computer generated holograms (CGH) and their binarization
- Development of at least one efficient method for digital hologram fabrication
 - Chosen "dummy" CGH: Airy beams
- Experiment with novel modulating functions

Ing. Călin Bogdan-Ștefăniță

5/39

Presentation plan

- Purpose of this work
- CGH Design
- Fabrication methods
- Characterization
- Conclusions

Ing. Călin Bogdan-Ștefăniță

6/39

Design

- From analytical solution:
 - Solution to Helmholtz equation → run simulation → calculate CGH
- Gerchberg-Saxton:
 - start from a random phase and minimize the errors
- Fraunhofer CGH:
 - simulate (sort of) the classical hologram fabrication method
- Binarization:
 - Most important part for fabrication
 - Not necessary, yet really helpful

Ing. Călin Bogdan-Ștefăniță

7/39

From analytical solution: Airy beams

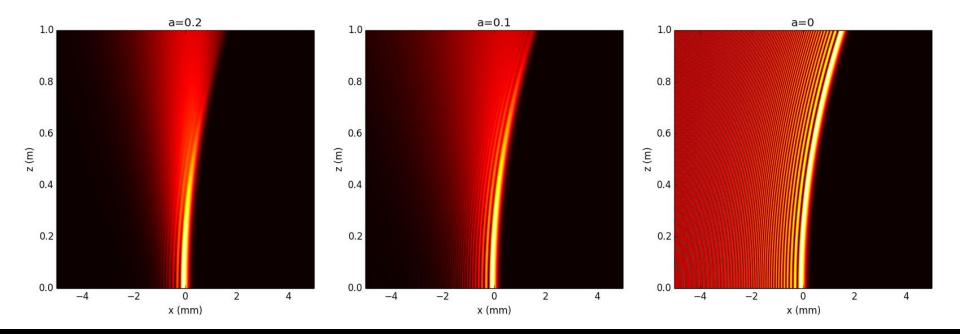

- Context regarding Airy beams
 - Berry and Balazs [1] accelerating electron wavepackets
 - pure mathematics in the context of quantum mechanics, but then again: waves are waves -> no reason for light not to do that as well, therefore:
 - 2007, first experiment with optics (Siviloglou *et al* [2])
 - potential and features: ballistic propagation, nondiffraction, self-healing, etc

Ing. Călin Bogdan-Ștefăniță

8/39

From analytical solution: simulationsAiry beam longitudinal simulations:

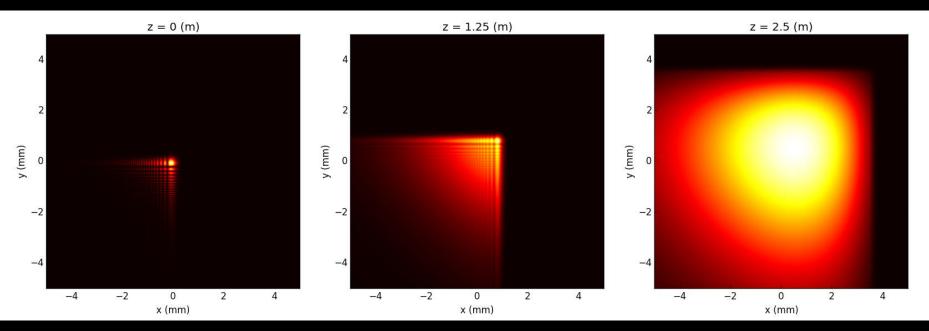

Ing. Călin Bogdan-Ștefăniță

9/39

From analytical solution: simulations

• Airy beam transverse simulations for an attenuation constant a=0.05:

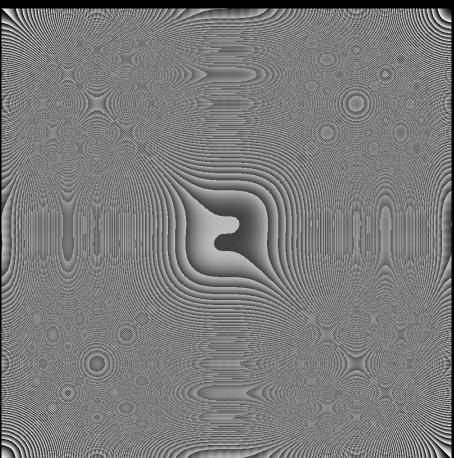

Ing. Călin Bogdan-Ștefăniță

10/39

From analytical solution: the CGHAiry beam CGH (8-bit):

Ing. Călin Bogdan-Ștefăniță

14/39

From analytical solution: trajectory

Ing. Călin Bogdan-Ștefăniță

15/39

Gerchberg-Saxton: original algorithm [3]

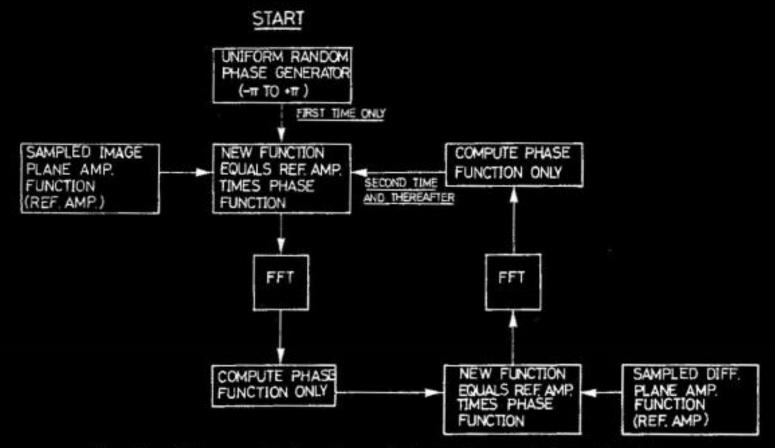

Fig. 1. Schematic drawing of phase determining algorithm.

Ing. Călin Bogdan-Ștefăniță

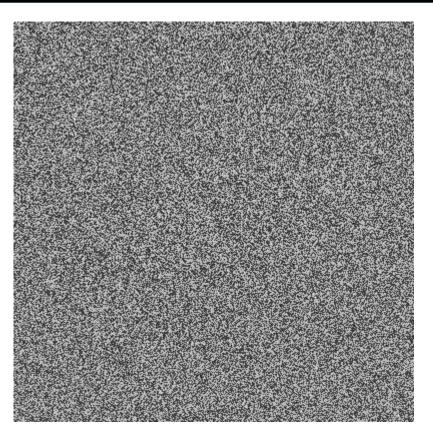

Gerchberg-Saxton: input - CGH

Input image

Resulted CGH (phase)

16/39

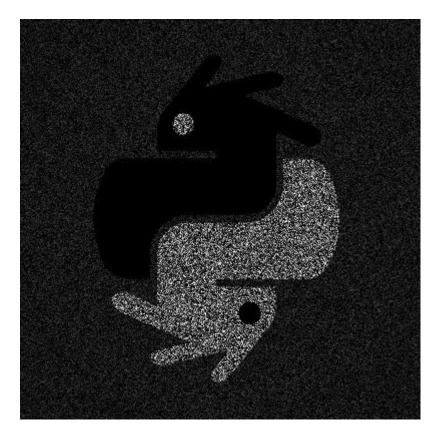

Ing. Călin Bogdan-Ștefăniță

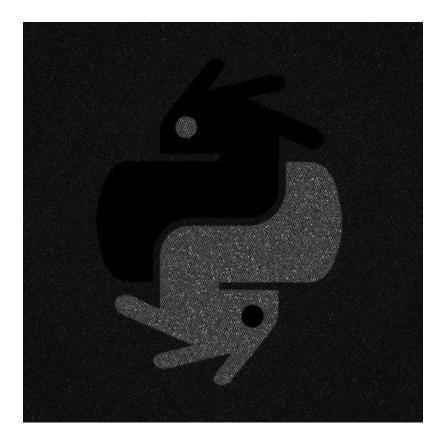

Gerchberg-Saxton: reconstructed image

1 iteration

10 iterations

17/39

Ing. Călin Bogdan-Ștefăniță

18/39

Fraunhofer CGH [4]:

- Create "object" and "reference" images*
 - Object == image we want to obtain
 - Reference == reference wave in classical holography
- FFT both, then add them (interference)
- Filter the result

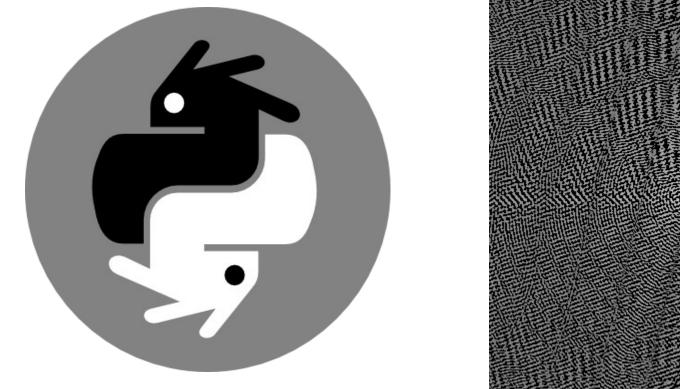

Ing. Călin Bogdan-Ștefăniță

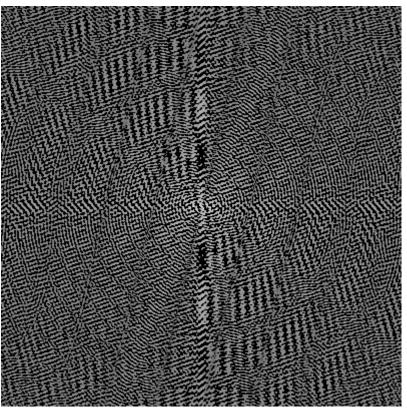

Fraunhofer CGH: input - CGH

Input image

Resulted CGH (amplitude)

19/39

Ing. Călin Bogdan-Ștefăniță

Fraunhofer CGH: input - reconstruction

Input image

Reconstructed image

20/39

Ing. Călin Bogdan-Ștefăniță

21/39

Binarization: why?

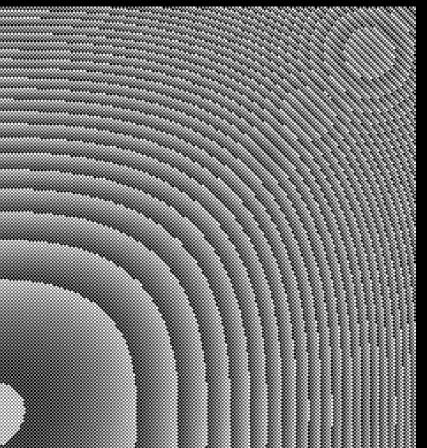

- CGH is a 256 gray levels (8-bit) bitmap
- Good results were obtained with 8 levels of gray (3-bit)
- Best case scenario: 2 levels, 0 and 1 / polymer and substrate / thin film and holes
- Solution: 1-bit CGH constructed as a 3-bit **equivalent**

Ing. Călin Bogdan-Ștefăniță

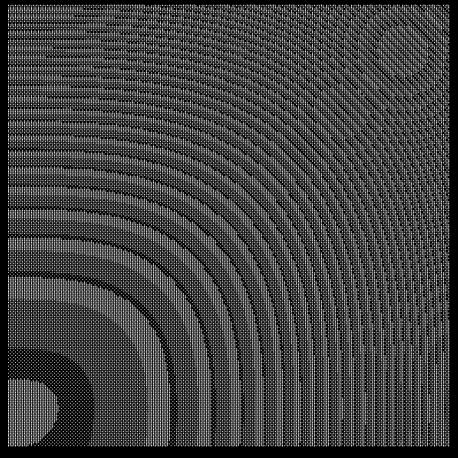

Binarization: example

8-bit hologram

3-bit equivalent binary hologram

22/39

```
22 Jan 2016
```

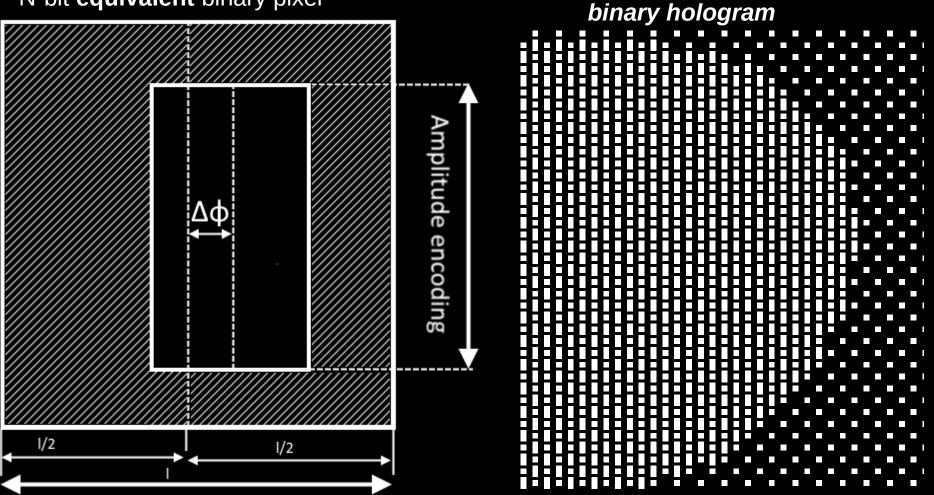

Ing. Călin Bogdan-Ștefăniță

23/39

Zoom in of the 3-bit *equivalent*

Binarization: how?

N-bit equivalent binary pixel

Ing. Călin Bogdan-Ștefăniță

24/39

Presentation plan

- Purpose of this work
- CGH Design
- Fabrication methods
- Characterization
- Conclusions

Ing. Călin Bogdan-Ștefăniță

25/39

Fabrication methods

- Nanoscribe "3D printing on the micrometer scale"
- Laser ablation the straight forward solution

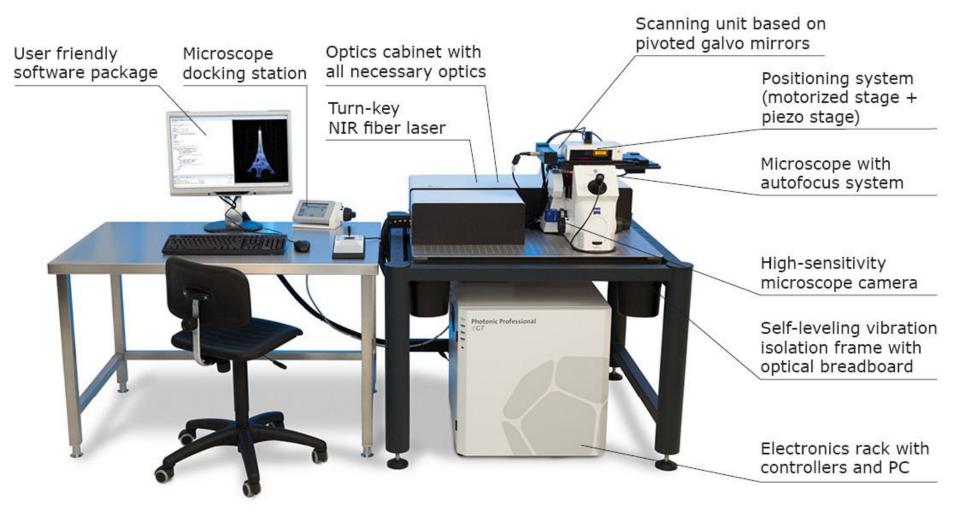

22 Jan 2016

"Politehnica" University of Bucharest – Faculty of Applied Sciences – Master IALA – Research Report, 3rd sem,

Ing. Călin Bogdan-Ștefăniță

26/39

Fabrication methods - nanoscribe

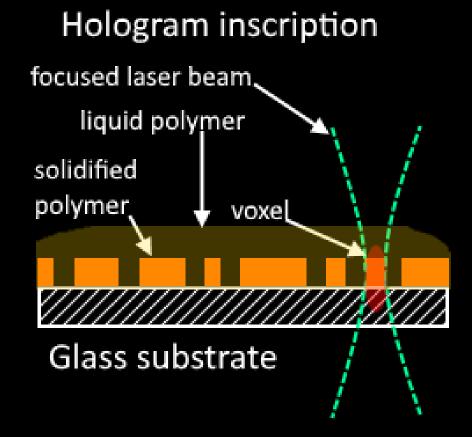

Ing. Călin Bogdan-Ștefăniță

27/39

Nanoscribe: how does it work?

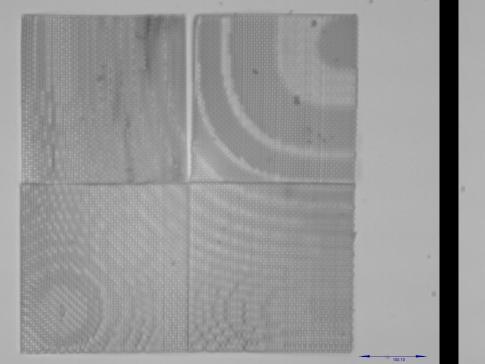

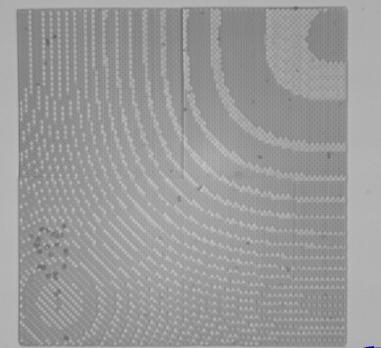

Ing. Călin Bogdan-Ștefăniță

Nanoscribe: experimental results

~1 micron per pixel equivalent, 250 x 4 (encoded gray levels) pixels

28/39

Ing. Călin Bogdan-Ștefăniță

Nanoscribe: experimental results

20.0

~1 micron per pixel equivalent

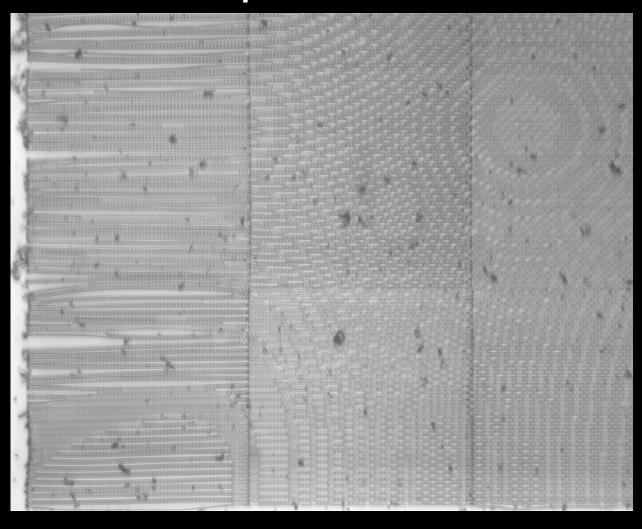

29/39

Ing. Călin Bogdan-Ștefăniță

30/39

Nanoscribe: experimental results

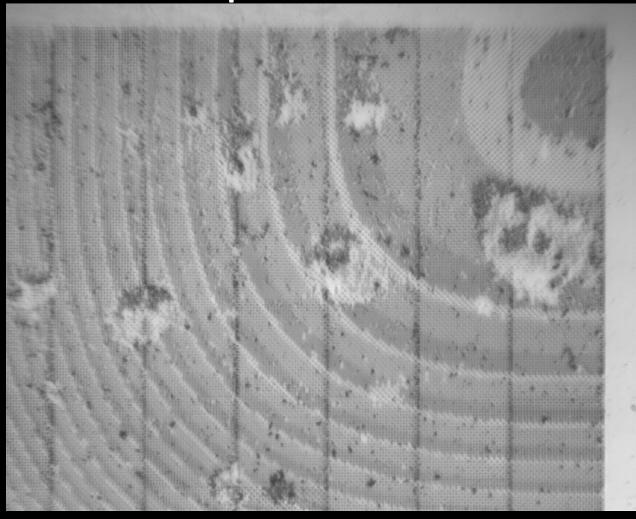

Ing. Călin Bogdan-Ștefăniță

31/39

Nanoscribe: experimental results

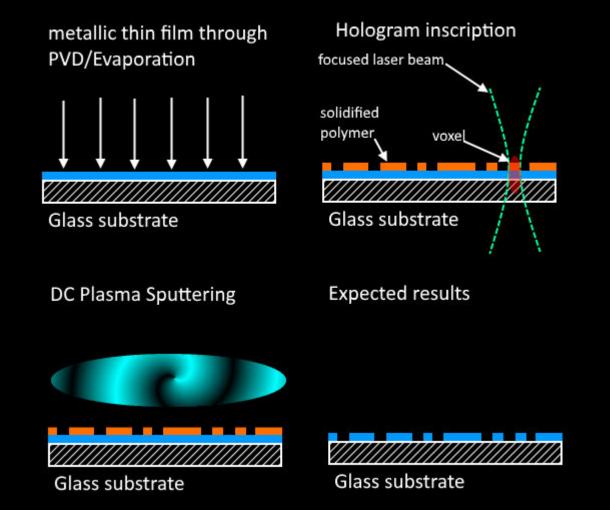

Ing. Călin Bogdan-Ștefăniță

32/39

Nanoscribe: future developments

Ing. Călin Bogdan-Ștefăniță

Laser ablation: principle

• Imprint the binary CGH in a thin (metallic) film

CGH inscription (laser ablation) on a metallic film without a substrate Expected results

33/39

 Compared to nanoscribe: simpler, a little faster, but much lower pixel density

Ing. Călin Bogdan-Ștefăniță

34/39

Presentation plan

- Purpose of this work
- CGH Design
- Fabrication methods
- Characterization
- Conclusions

Ing. Călin Bogdan-Ștefăniță

35/39

Characterization

- Comparison of results between CGH and SLM
 - Image reproduction
 - Light efficiency
 - Noise
- Comparison of normal (256 levels) CGH and binary CGH (binary CGH have lower contrast)
- Structural characterization
 - % of "*misfired*" pixels
 - Homogeneity and structural integrity

Ing. Călin Bogdan-Ștefăniță

36/39

Presentation plan

- Purpose of this work
- CGH Design
- Fabrication methods
- Characterization
- Conclusions

Ing. Călin Bogdan-Ștefăniță

37/39

Conclusions

- Developed an integrated software package for CGH calculation (GUI in progress)
 - Airy beams
 - Arbitrary images with GS or Fraunhofer numerical methods
 - Binarization
- Constructed CGH with the nanoscribe installation
 - Method can still be improved
- Currently building the other (laser ablation) CGH fabrication installation

Ing. Călin Bogdan-Ștefăniță

38/39

Thank you for your attention!

22 Jan 2016
